

In conclusion, monoclonal antibodies tend to reduce PSL dose and prevent the progression of bronchiectasis in patients with glucocorticoid-dependent ABPM, but did not achieve statistical significance. A larger number of patients with a prospective study design is needed to shed more lights in this regard.

Conflict of interest

Sunao Mikura received a lecture fee from Sanofi.

Data Availability Statement

The data that support the findings of this study are available on request from the corresponding author. The data are not publicly available due to privacy or ethical restrictions.

Human/Animal Ethics Approval Declaration

This research was approved by Faculty of Medicine Research Ethics Committee, Kyorin University (Approval number: 1865-01), and the procedures followed were in accordance with the Declaration of Helsinki.
